VizZle[®] Launches the VizZleGram

New Service Allows Educators of Students with Autism to Share VizZle Lessons with Anyone, Extending the Visual Learning Experience Outside of the Classroom

Shaker Heights, OH (Feb. 10, 2011) – Educators working with students in the Autism Spectrum can now easily encourage visual learning outside of the classroom as VizZle introduces the “VizZleGram,” a new service that teachers, speech therapists, and occupational therapists can use to share interactive lessons with parents, after school programs and tutors.

VizZleGrams make it easy for educators to send a VizZle lesson to anyone with an email address, whether they have a VizZle account or not. Upon receipt of the VizZleGram, the recipient can quickly and easily play the shared lesson, extending the learning experience beyond the classroom. Sending a VizZleGram is easy; VizZle users simply click on the VizZleGram button in the lesson’s activity summary and enter the appropriate email address of the recipient.

“VizZle in the classroom is a wonderful way to teach students with Autism; extending the VizZle experience beyond the school environment was the next logical step,” notes Terry Murphy, CEO of VizZle. “Students with Autism will benefit greatly from the ability to learn outside of the classroom, as will those supporting their learning needs, whether they’re teaching in an after-school program, learning at home, or accessing shared VizZle lessons on the go.”
