VizZle[®] Releases Classroom Edition- featuring NEW Mobile Player

Classroom Edition Gives Teachers the Ability to Work with More Students Anytime, Anywhere!

Shaker Heights, OH (Apr. 18, 2011) –VizZle, the web-based visual learning software for autism and special needs produced by Monarch Teaching Technologies, announces the launch of the VizZle Classroom Edition, featuring the all NEW Mobile Player.

The VizZle Classroom Edition includes three additional student player licenses with every teacher license and is now mobile tablet compatible. Teachers can select which type of technology meets a student’s learning style best – an interactive white board, a desktop or laptop, and now even a mobile tablet. VizZle offers more than 15,000 pieces of media and 4,000 peer reviewed lessons to help foster independent learning and it tracks student performance against IEP goals.

“Teachers using VizZle love how it helps them work with students with autism anytime and anywhere, but often tell us they wish they could work with more students,” says Terry Murphy, CEO of Monarch Teaching Technologies. “With VizZle Classroom Edition, teachers can work with three additional student players per license, exponentially increasing student time on task with interactive visual learning supports for all curriculum content areas, a huge plus for teachers of students with autism and special needs.”

VizZle’s intuitive design is easy to learn and includes embedded professional development to help teachers learn as they use VizZle, including a Moodle[®] powered self-study course and on demand video modules. Teachers interested in trying the new VizZle Classroom Edition can sign up for a free trial at: <http://www.monarchtt.com>.

About VizZle

VizZle, produced by Monarch Teaching Technologies, is an easy-to-use, web-based authoring tool that empowers educators to create fun, interactive, visually supported curriculum customized to the needs of children with autism and other learning challenges. Using any of the thousands of pre-made lessons from the peer-reviewed shared library or using lessons created with flexible templates and thousands of in-program or imported images, audio and video clips, teachers can track improved outcomes by IEP goals or any state standard.
