

VizZle[®] Consultant Programs

Are you a professional who assists with the choice of assistive technology, provides professional development opportunities, gives consultation, presents at professional conferences, or teaches undergraduate or graduate courses in education? You may qualify to participate in one of our VizZle Consultant Programs.

Assistive Technology Consultants

Designed for professionals who support teachers, an Assistive Technology Consultant is someone who reviews and recommends appropriate tools for the classroom, aides teachers with setup and support, and/or supports the school/home connection. The program provides:

- Free access to VizZle
- Special free trials for your group
- VizZle Webinar professional development sessions exclusive to your group by appointment

Certified VizZle Trainer (CVT)

Designed for professionals interested in leading professional development sessions on learning how to use VizZle, the CVT program prepares, certifies and supports your efforts. Once certified, your benefits include:

- Free access to VizZle
- Free professional development to keep your expert status up to date
- The right to conduct official VizZle professional development sessions
- Membership on the ad hoc development advisory panel which guides future development for the software

Visual Learning Advocate

Designed for both experts on Visual Learning who share knowledge via professional presentations at local, state, national or international conferences, and/or professionals who provide services to other agencies, schools, organizations or groups of professionals in special education, a Visual Learning Advocate is certified to present on visual learning and using VizZle with students. Program benefits include:

- Free access to VizZle
- Free professional development to keep your expert status up to date
- Access to VizZle materials for your presentations

Professor's Program

Designed for university faculty teaching undergraduate or graduate level education courses, the University Program extends benefits to both you and your students, including:

- Free access to VizZle for the faculty member
- Free access to VizZle for students for the length of the course and a discounted rate thereafter
- A special shared folder for accessing unmoderated lessons assigned as coursework

Our Mission

To empower educators, clinicians and parents to effectively engage, clearly communicate with, and efficiently educate individuals with autism or other communication disorders.

Our Partner

Research on visual learning conducted in the classrooms of the **Monarch Center for Autism** inspired the creation of VizZle. Over 80 staff at the Monarch Center continue to bring their dedication and experience to VizZle as we work together to further develop and improve the software. Founded in 2000, The Monarch Center provides services across the lifespan for individuals with autism, including a chartered nonpublic day school that provides ideal special education programs for autism, and the **Monarch Boarding Academy**, an extraordinary residential learning environment created specifically for children and teens with autism.

Our Company

Based in Shaker Heights, Ohio, **Monarch Teaching Technologies, Inc.** (monarchtt.com) is committed to technology-enhanced solutions that can provide more effective and cost-efficient support for children with special needs. After a four-year R&D collaboration with researchers from **Children's Hospital Boston/Harvard Medical School** and the **Monarch Center for Autism**, funded in part by **National Institutes of Health** grants, the company introduced VizZle for the general market in 2009.

Our Solution

VizZle® is state-of-the-art web-based special education software for quick and easy creation and sharing of customized, interactive visual curricula. The over 5,000 pre-made lessons in the peer-reviewed shared library or the easy-to-use lesson creation templates can be completely customized using resident media from a database of over 15,000 images, sound effects and video clips or with personal imports. VizZle lessons have built-in fun factors making every interactive lesson engaging on desktop computers, laptops, touchscreens, electronic whiteboards, Android tablets and iPads. Built-in tracking by any state standard or IEP goal supports data-driven decision making.
