

Setting Up Student Play Over Break

The VizZle Player App Makes It Quick and Easy

The VizZe Player App is a separate, simplified part of the VizZle system. It allows your students to play the lessons you set up for them, without the risk that they will end up in other parts of VizZle without your knowledge.

- It's easy for you to set up (It takes way longer to read about it than to do it!)
- It's easy for your student to access and play
- Unlike VizZleGrams, you can use any lessons (lessons you have created or edited as well as lessons from the shared library)
- VizZle Player *Web* now allows students to play these lessons from anywhere, right inside their web browser, no installation needed

The VizZle Player is an ideal way to provide great VizZle lessons for your students during school vacations.

Setting Up Lessons for School Vacations

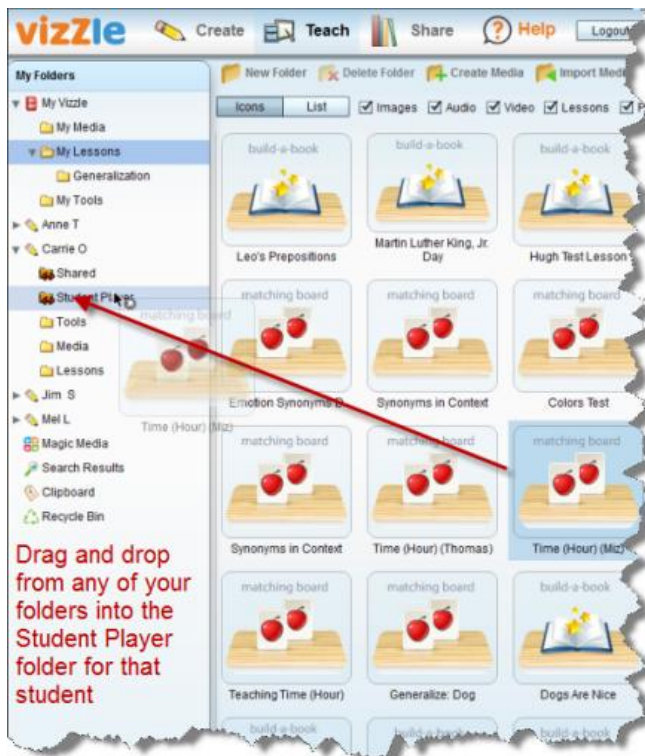

NOTE: The following steps assume that you have already set up Student Folders for your students. If that is not the case and you need instruction on how to do so, please visit *VizZle 101* at VizZle University (www.learnvizzle.com) and review section 6.

1. Log in to VizZle and go to TEACH. Each of your students has a Student Player folder under their name.

(Reminder: If you don't see the folders under a student's name, click the arrow to the left of their name.)

2. Add the lessons you want played over break to the student's Student Player folder.

From Your Folders:

Find the lesson in your folder. Click on it. Drag it to the left and drop it into the Student Player folder.

From SHARE:

To add a lesson from SHARE, go to SHARE. Find a lesson. Drag and drop the icon for that lesson from the search results into the Student Player folder for that student (on the left in the My Folder panel).

(Reminder: Students can play Matching Boards, Books, Games and Sorting Boards independently—so only put those lesson types in the folder)

3. Log in to the VizZle Player with the student's username and password just to double check that all is well and it is ready to go.

You access VizZle Player Web by going to www.govizzle.com. Click on the orange Play from Browser button. Click on the blue VizZle Player Web and log in (using the student's username and password, to see what they will see when they log in from home).

Tips:

1. Don't remember your student's username and password? No problem! Log in to VizZle, go to TEACH and click on My VizZle. At the bottom of this screen you will see your students' names. Double click on any of their names to see their username and reset their password.
2. Use our [VizZle Player Parent Letter](#) to tell your students' parents about VizZle and how to use the VizZle Player over break. Click here to open a PDF of the letter.
